

Colour Testing

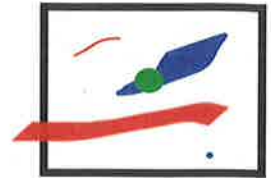

The colours need to be distinct to be easily recognised by the programme.

We recommend to use red, blue and green.

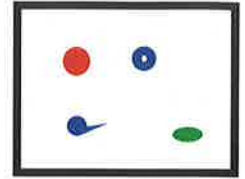

Aim for the marks:

- not touching the box borders
- not overlapping
- being compact, not too thin

Bad

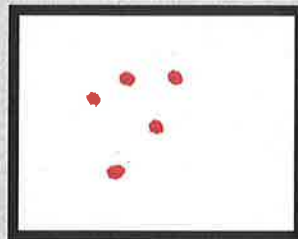

Good

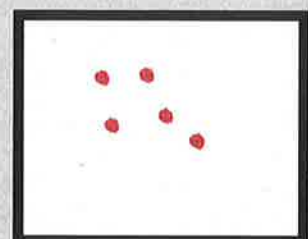

5 marks per box with the FIRST colour marker (recommended **red**):

1

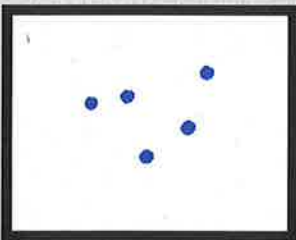

2

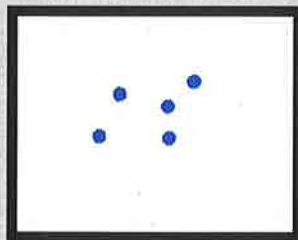

3

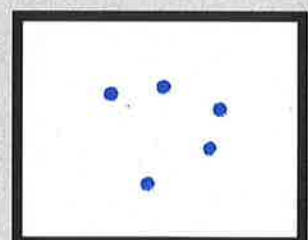

5 marks per box with the SECOND marker (recommended **blue**):

4

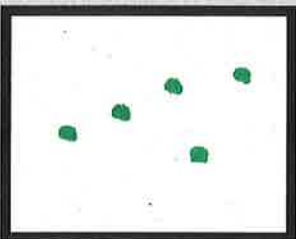

5

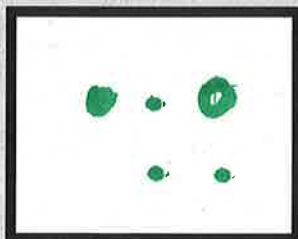

6

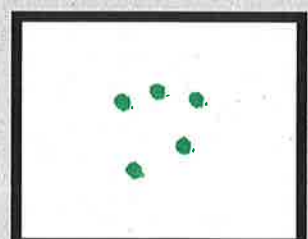

5 marks per box with the THIRD marker (recommended **green**):

7

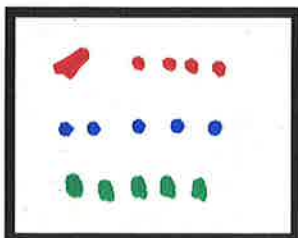

8

9

Five marks of each colour
